

01

GOAL

People management web app

02

DATABASE

Design & Implement your DB

03

BACKEND

Make your data work

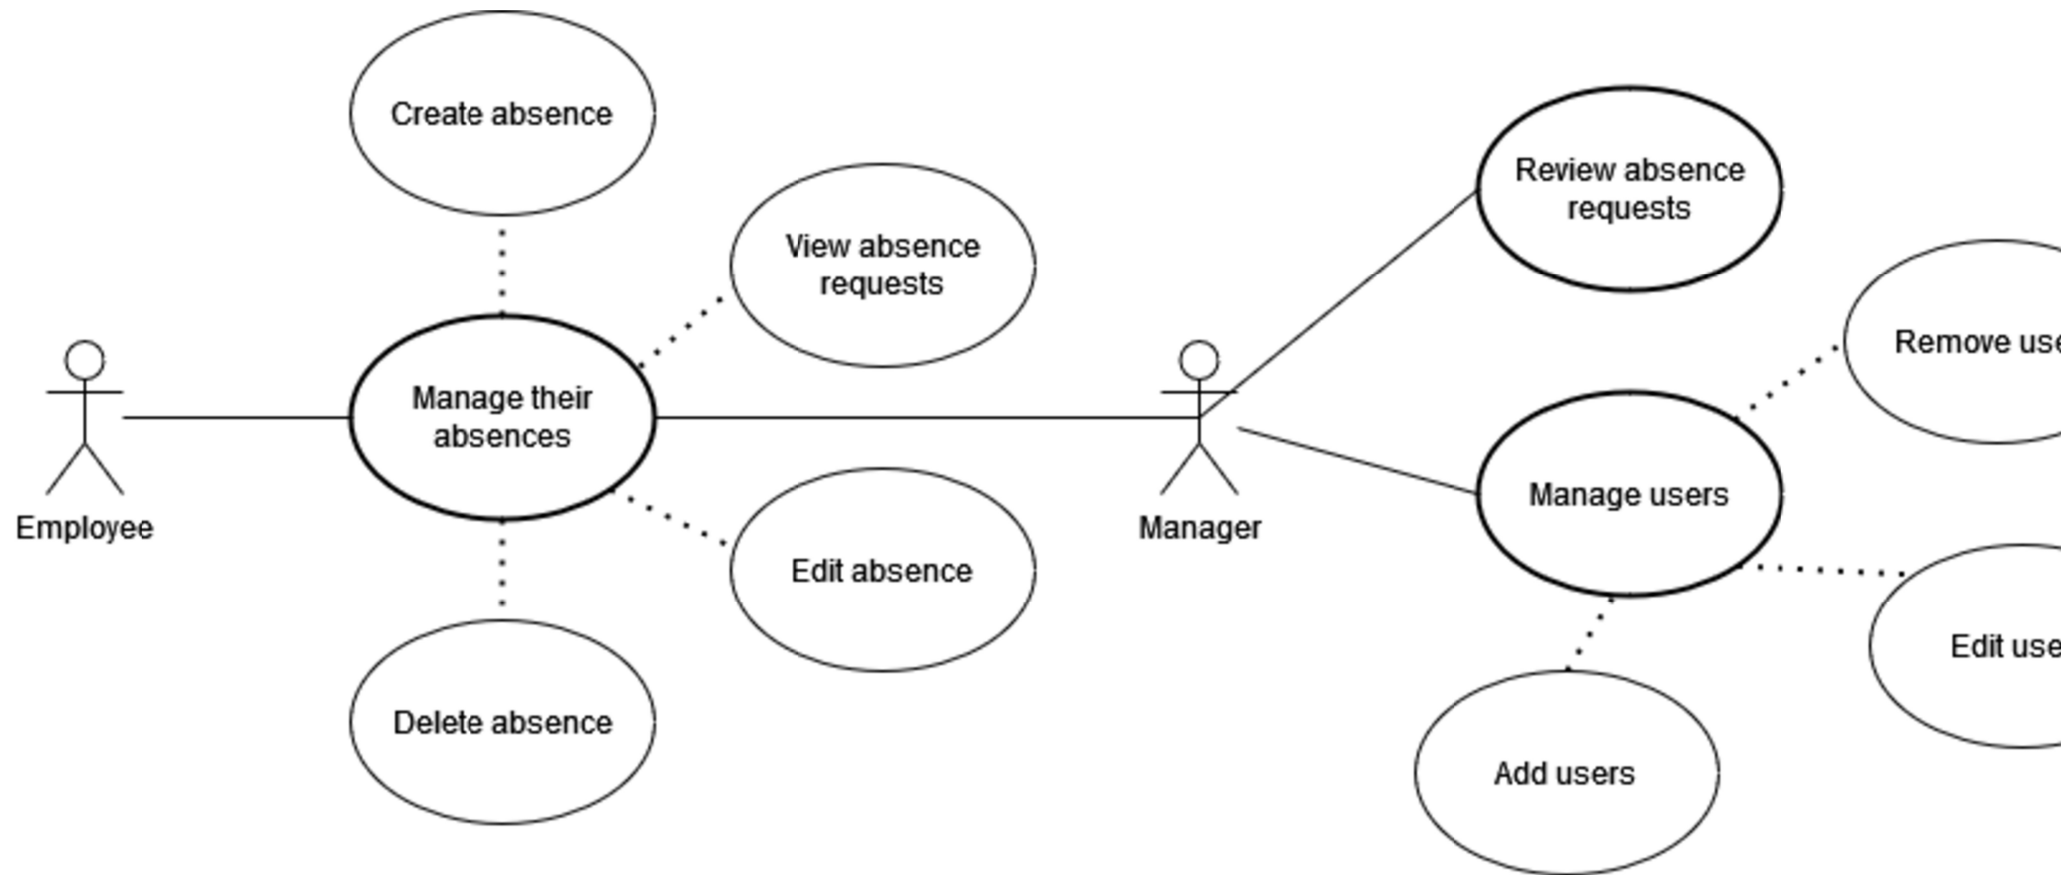

04

FRONTEND

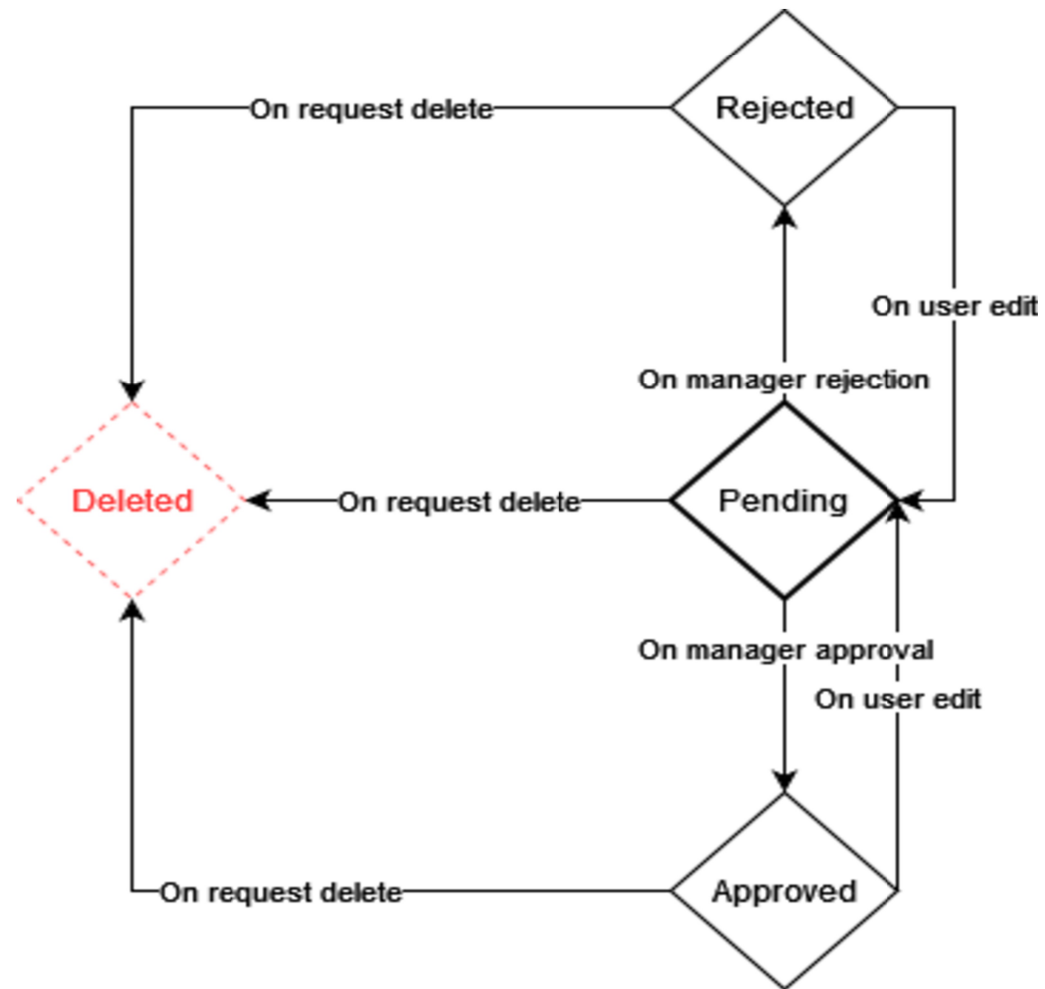

The final product.

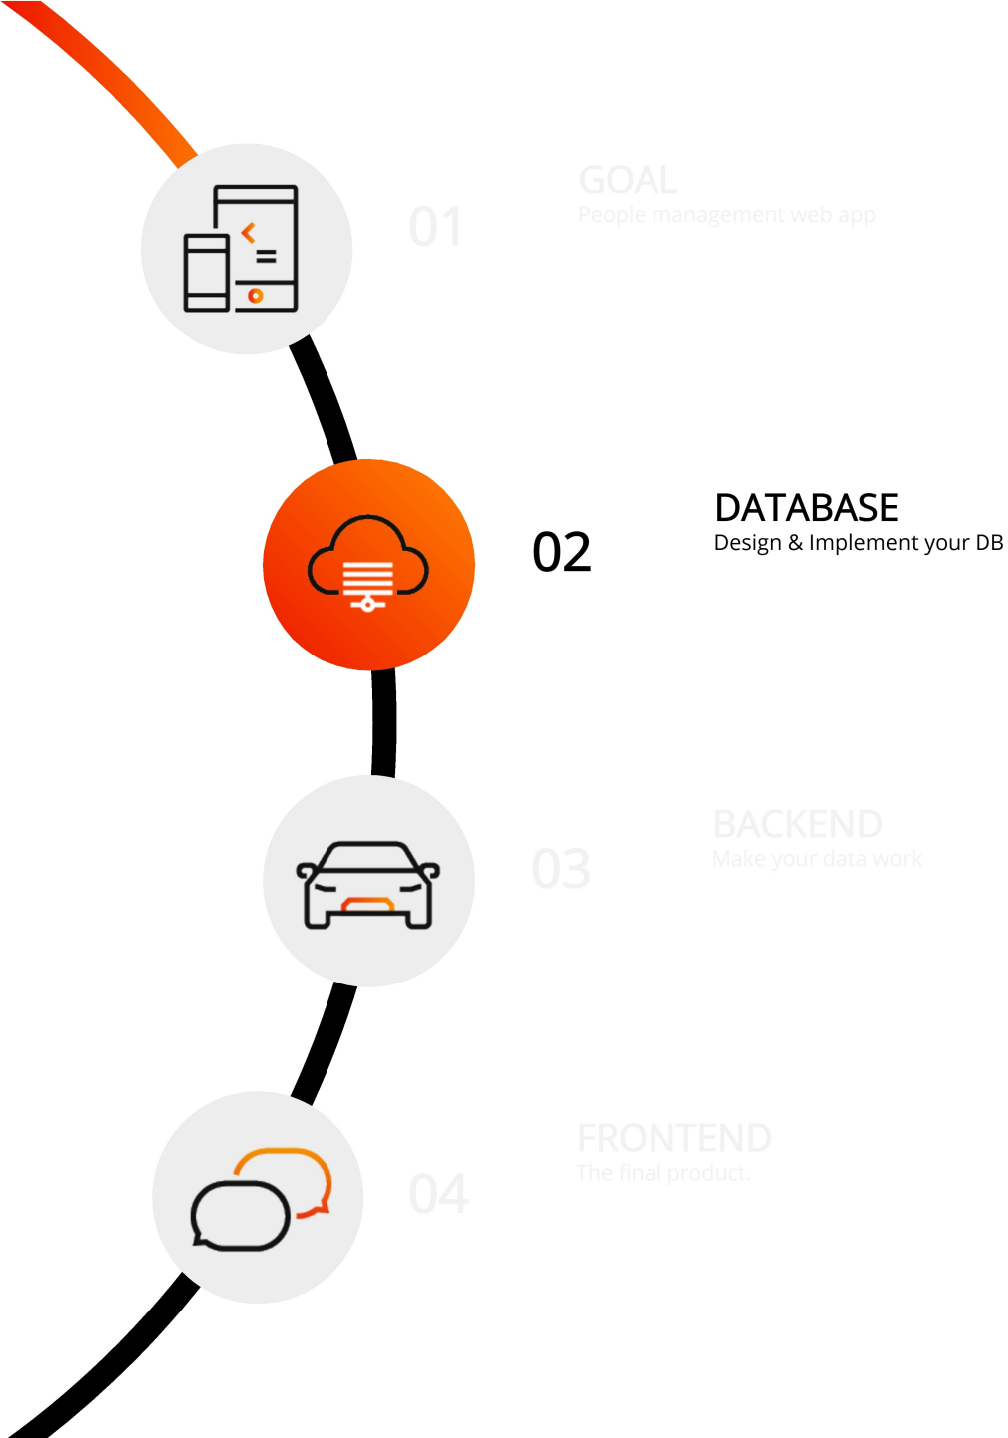

GOAL

- Your goal is to make a people management app to handle absences in a small company.
- The app will be used by employees and managers

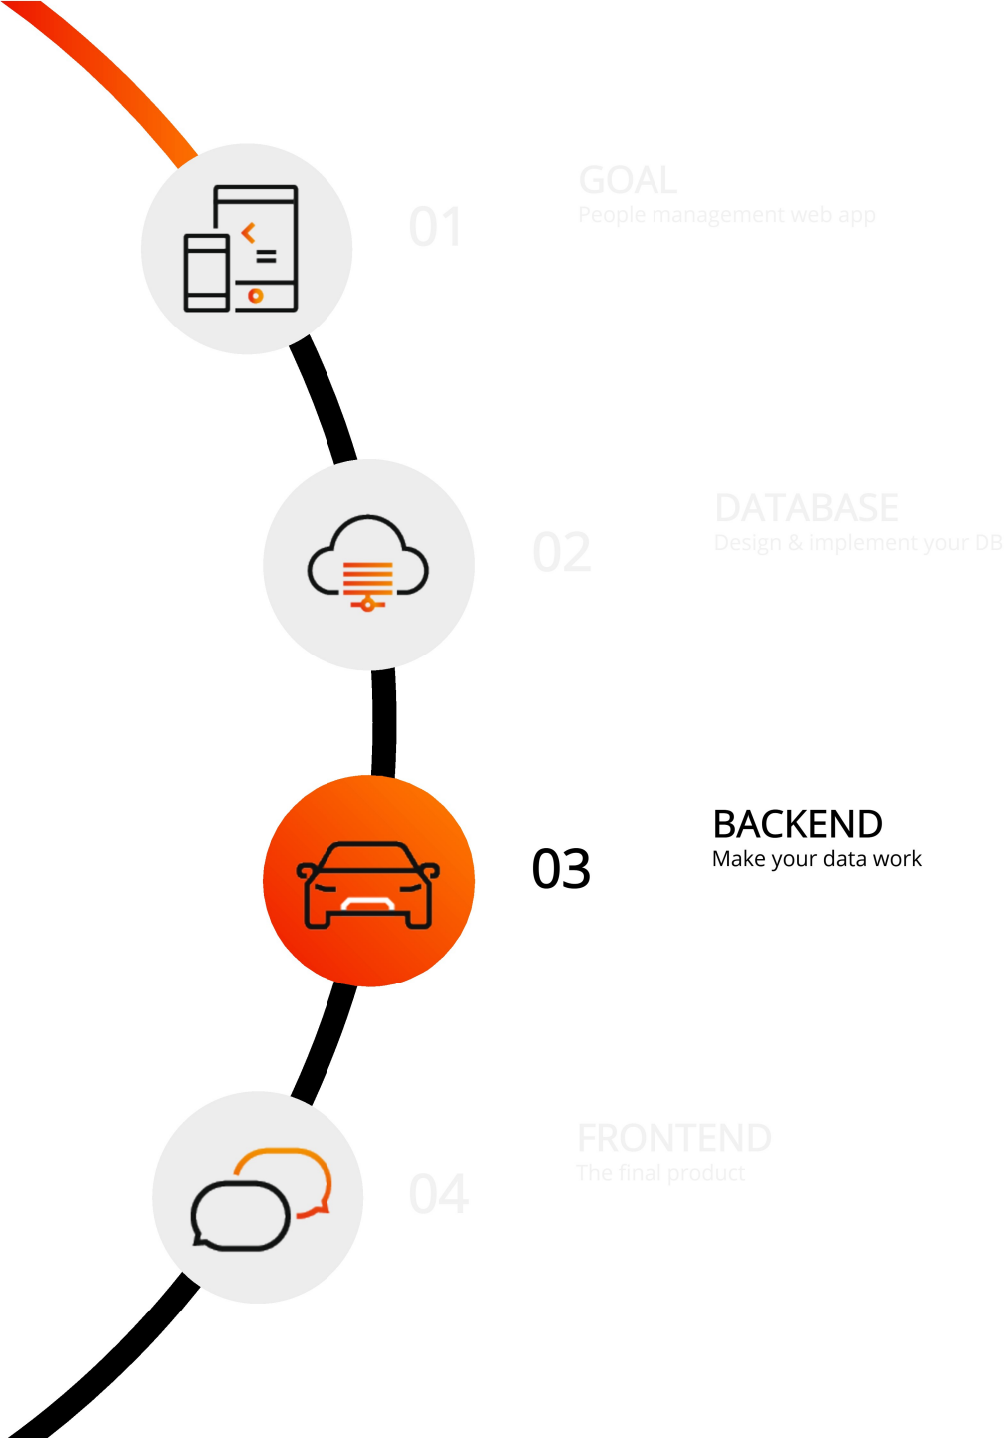

Absence life cycle

DATABASE

- Our "client" has asked us to use PostgreSQL as the Database solution
- You have to design a DB based on the previous requirements (use case diagram, problem description, feedback)

BACKEND

- To be implemented with NodeJS & Express
- Accepts HTTP request to interact with the business data
